DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Species I in the reply filed on 12/18/2009 is acknowledged.
2. Claims 2, 4, 7 and 8-20, 22 and 24-25 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected Species II-V, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 12/18/2009.
3. Claim 1-7 are allowable. The restriction requirement, as set forth in the Office action mailed on 11/25/2009, has been reconsidered in view of the allowability of claims to the elected invention pursuant to MPEP § 821.04(a). **The restriction requirement is hereby withdrawn as to any claim that requires all the limitations of an allowable claim.** Claim 2, 4 and 7, directed to non elected species no longer withdrawn from consideration because the claim(s) requires all the limitations of an allowable claim by being dependent of an allowable claim. However, claims 8-20, 22 and 24-25, directed to non-elected species remain withdrawn from consideration because do not require all the limitations of an allowable claim.

In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Once a restriction requirement is **withdrawn**, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

EXAMINER'S AMENDMENT

4. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows: this application is in condition for allowance except for the presence of claims directed to Species II, Species III, Species IV and Species V non-elected without traverse. Accordingly, non-elected claims 8-20, 22 and 24-25 have been cancelled.

Allowable Subject Matter

5. **Claims 1** is allowed. The following is an examiner's statement of reasons for allowance: none of the references either singularly or in combination teach or fairly suggest an image reproduction apparatus including an image copying function for reproducing input image data including image data obtained by reading a document, and for outputting the reproduced image data, the image reproduction apparatus comprising: extension control means to which a controller board is connectable to add a plurality of optional units to realize plurality of extension functions, the extension control means allowing operation control in the plurality of extension functions to be

performed in a same manner as in the image copying function, and allowing image data to be input/output in the extension functions in a same format as in the image copying function, the controller board including a system controller and an arbiter that arbitrates use of resources shared by the plurality of extension functions; image quality retaining means for retaining a quality of an image reproduced via the extension control means at a level similar to that of an image produced by the image copying function; operation control means for controlling operation of the image reproduction apparatus in a similar manner, regardless of whether the operation is associated with the image copying function or the plurality of extension functions provided by the extension control means; resource sharing means for allowing a resource used in the image copying function to also be used by the extension control means in inputting and/or outputting image data; image input means for reading an image of the document and outputting image data of the document image; and image input/output control means for controlling inputting/outputting of image data depending on an output characteristic of image data output from the image input means such that the image input means inputs/outputs image data in the same form.

Claims 2-7 are allowed because they depend of claim 1 allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
